Information regarding the COVID-19 situation

Dear clients and business partners,

The world is facing a critical challenge with the worldwide spread of the Corona Virus (Covid-19). Unprecedented measures need to be taken in order to further fight the spread of the virus and keep as many people as safe as possible.

Nordic Water Products AB is following the guidance of the World Health Organization (WHO) and of local governments in the countries where we have local physical presence.

Throughout this situation – and as always – the safety of our employees, customers and business partners are of utmost importance to us. Meanwhile our operations towards our customers' projects are a priority for us. We will use communications via Teams, e-mail and telephone as an environmentally friendly alternative.

However, as advised by the WHO and local authorities, any travel of our employees is forbidden until further notice. This is temporarily affecting our service functions as no service technician can travel on site.

We will monitor the evolution of the crisis and we will continue communicating about the possible impact for our customers with ongoing projects.

We are highly confident that together, with our clients and business partners we will successfully overcome the upcoming challenges and even strengthen our resilience capabilities.

Stay healthy and best regards,

Management team, Nordic Water
